-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 July 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1632

Claims 9-13, 15-18, 20 and 22-25 appear to be improperly dependent. This restriction is based on a reasonable dependency. Applicant should correct dependency and respond using the groups below regardless of correct claim numbers.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 and 19, drawn to a method of producing a viable hybrid cell having a single functional mitochondrial population comprising introducing genomic DNA from a mitochondrially depleted donor cell into a recipient cell, a hybrid cell and an animal, classified in class 435, subclass 375.
- II. Claims 8-13 and 25, drawn to a method of producing a cloned embryo comprising introducing genetic material into an enucleated recipient cell, introducing sperm mitochondria and causing the hybrid cell to develop into an embryo, a cloned embryo and an animal, classified in class 800, subclass 24.
- III. Claims 14-20 and 20, drawn to a method of producing a hybrid cell from a non-differentiated stem cell comprising introducing cytoplasm from a donor oocyte into an undifferentiated cell, a hybrid cell and animal, classified in class 435, subclass 377.
- IV. Claims 21-25, drawn to a method of increasing the viability of an oocyte, a zygote or an embryonic cell having abnormally low numbers of mitochondria comprising introducing genomic DNA and cytoplasm from the oocyte into an undifferentiated cell, classified in class 435, subclass 375.

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the methods of inventions I-IV require materially different and separate protocols for

Art Unit: 1632

materially different and separate outcomes. This is to say the method steps of invention are not required for inventions II-IV; the method steps of invention II is not required for inventions I, III or IV; the method steps of invention III is not required for inventions I, II or IV; and the method steps of invention IV is not required for inventions I-III.

These inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction were not required because the inventions have acquired a separate status in the art in view of their different classification, due to their recognized divergent subject matter, and because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1632

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah Crouch, Ph.D. whose telephone number is 571-272-0727. The examiner can normally be reached on M-Fri, 7:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Peter Paras can be reached 517-272-4517. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
